

# Technology-Assisted Care for Substance Use Disorders

## Training of Trainers Announcement

**Aug 31-Sept.1**

**Austin, TX**

**Sheraton Austin Hotel**  
701 East 11th Street

Advances in computer-assisted interventions for substance use disorders show great promise for increasing reach, improving services, and enhancing patient health outcomes; This workshop describes how clinicians can extend and enhance their practice by incorporating specific interventions such as “TES” which is a web-based version of the Community Reinforcement Approach plus contingency management approach. Attendees will have the opportunity to observe and experience the web-based interventions.
